

Your data called,
it wants a **Safer**
connection.

A random call asking for a code is **phishy**.
That's your cue,
change your passwords.

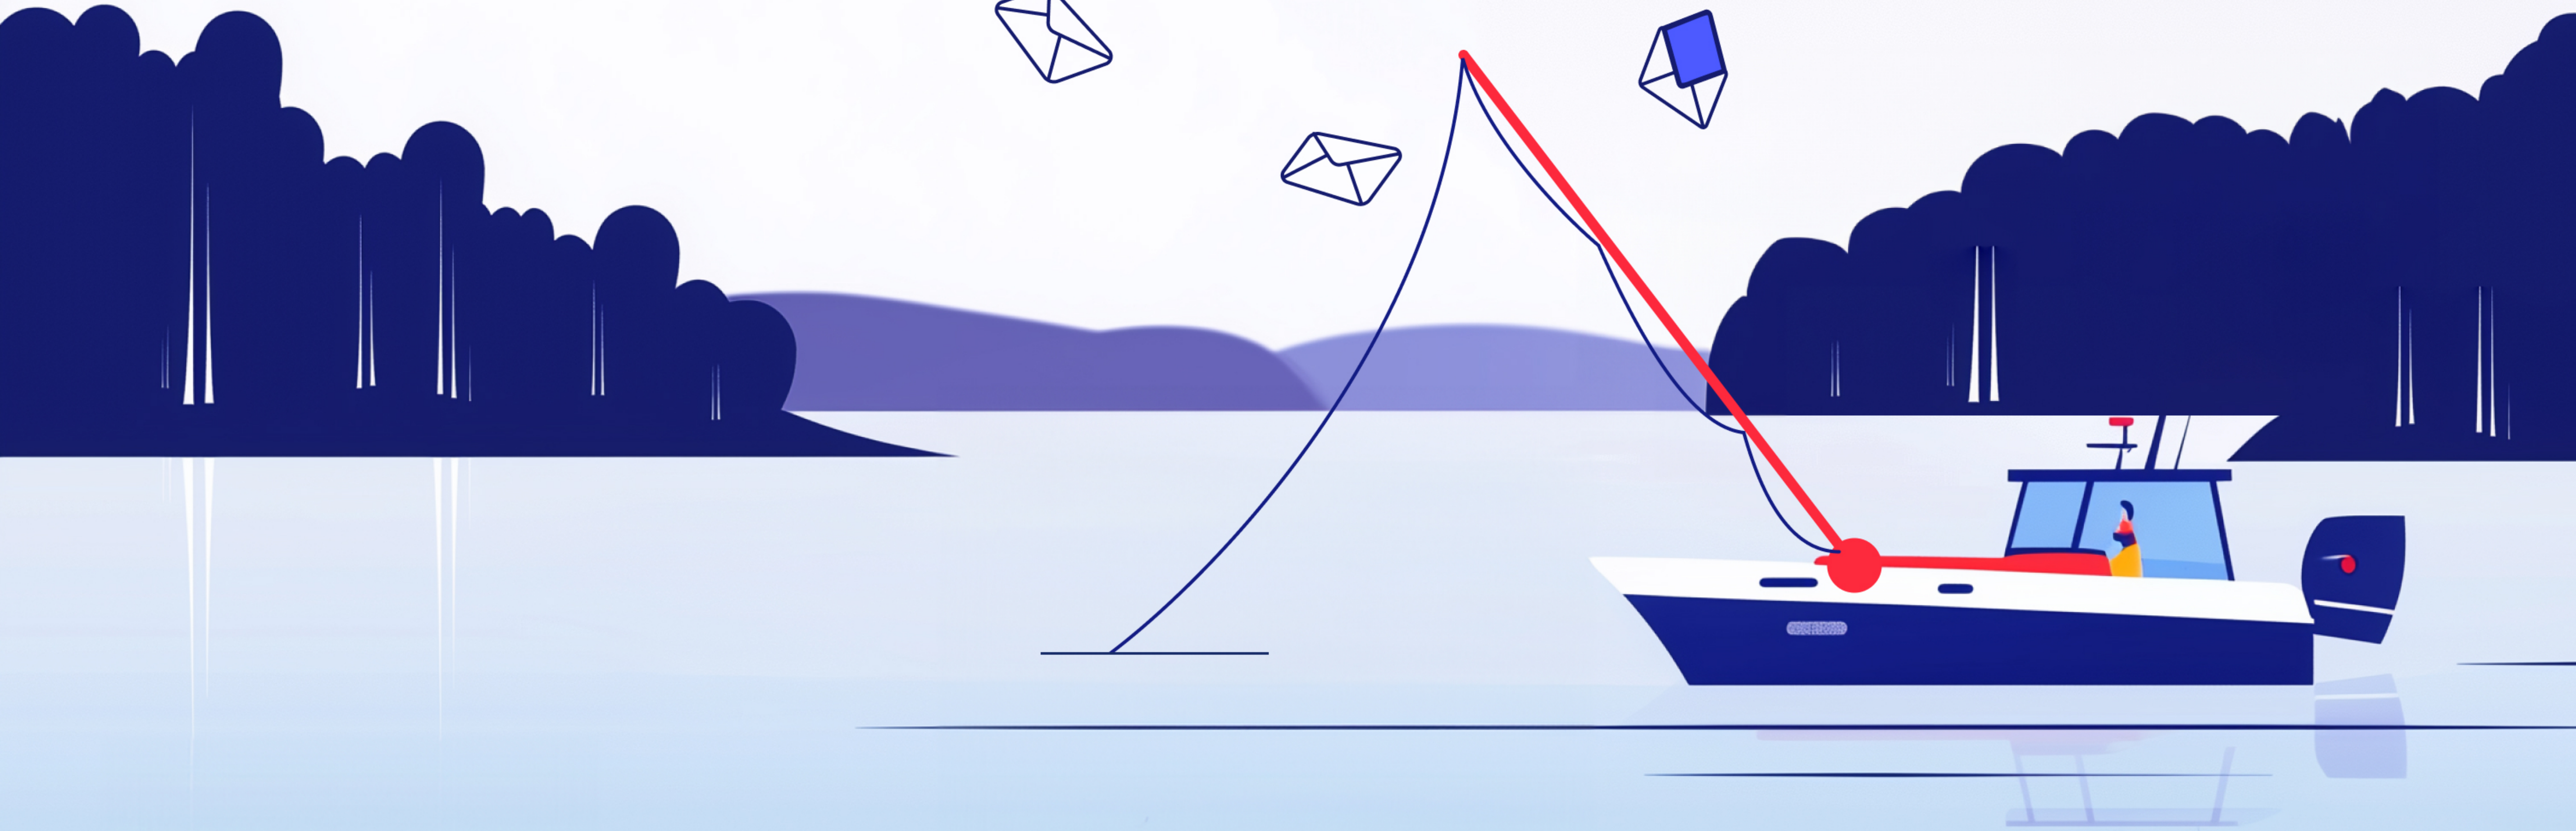

You think
software updates
are annoying?

Try getting
hacked.

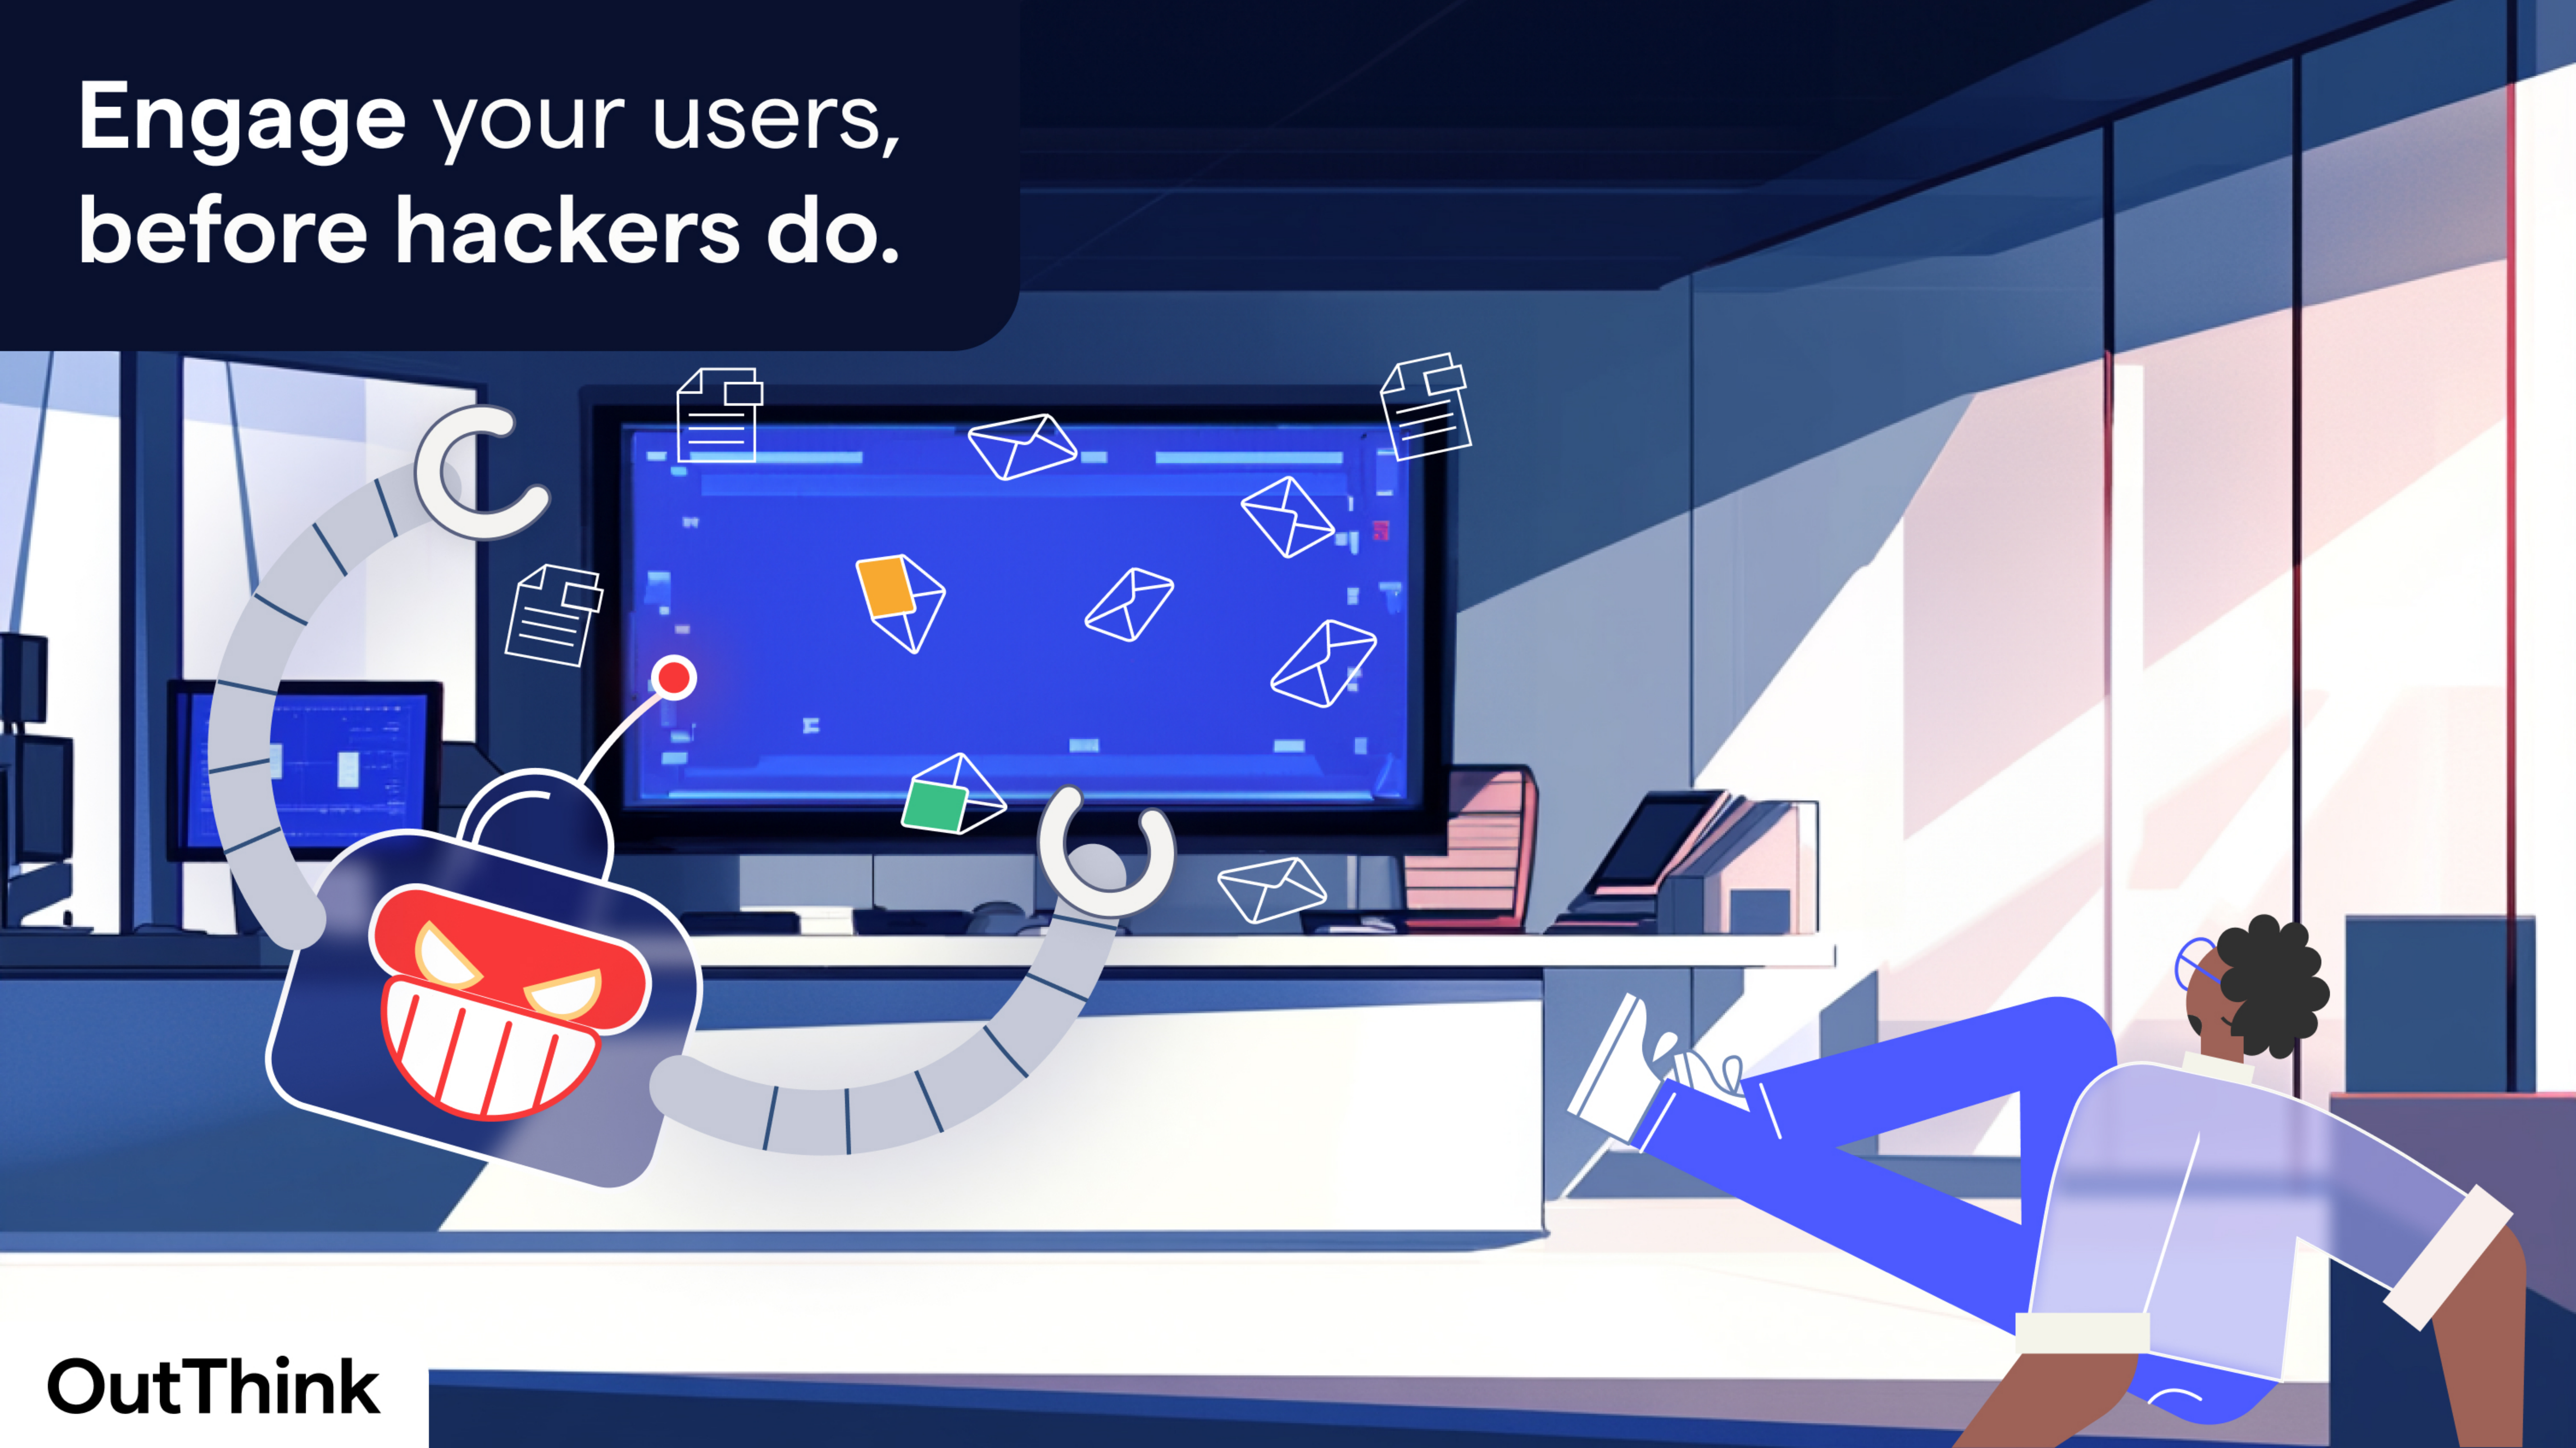

If you **SPOT**
the **phish...**

REPORT
the **phish...**

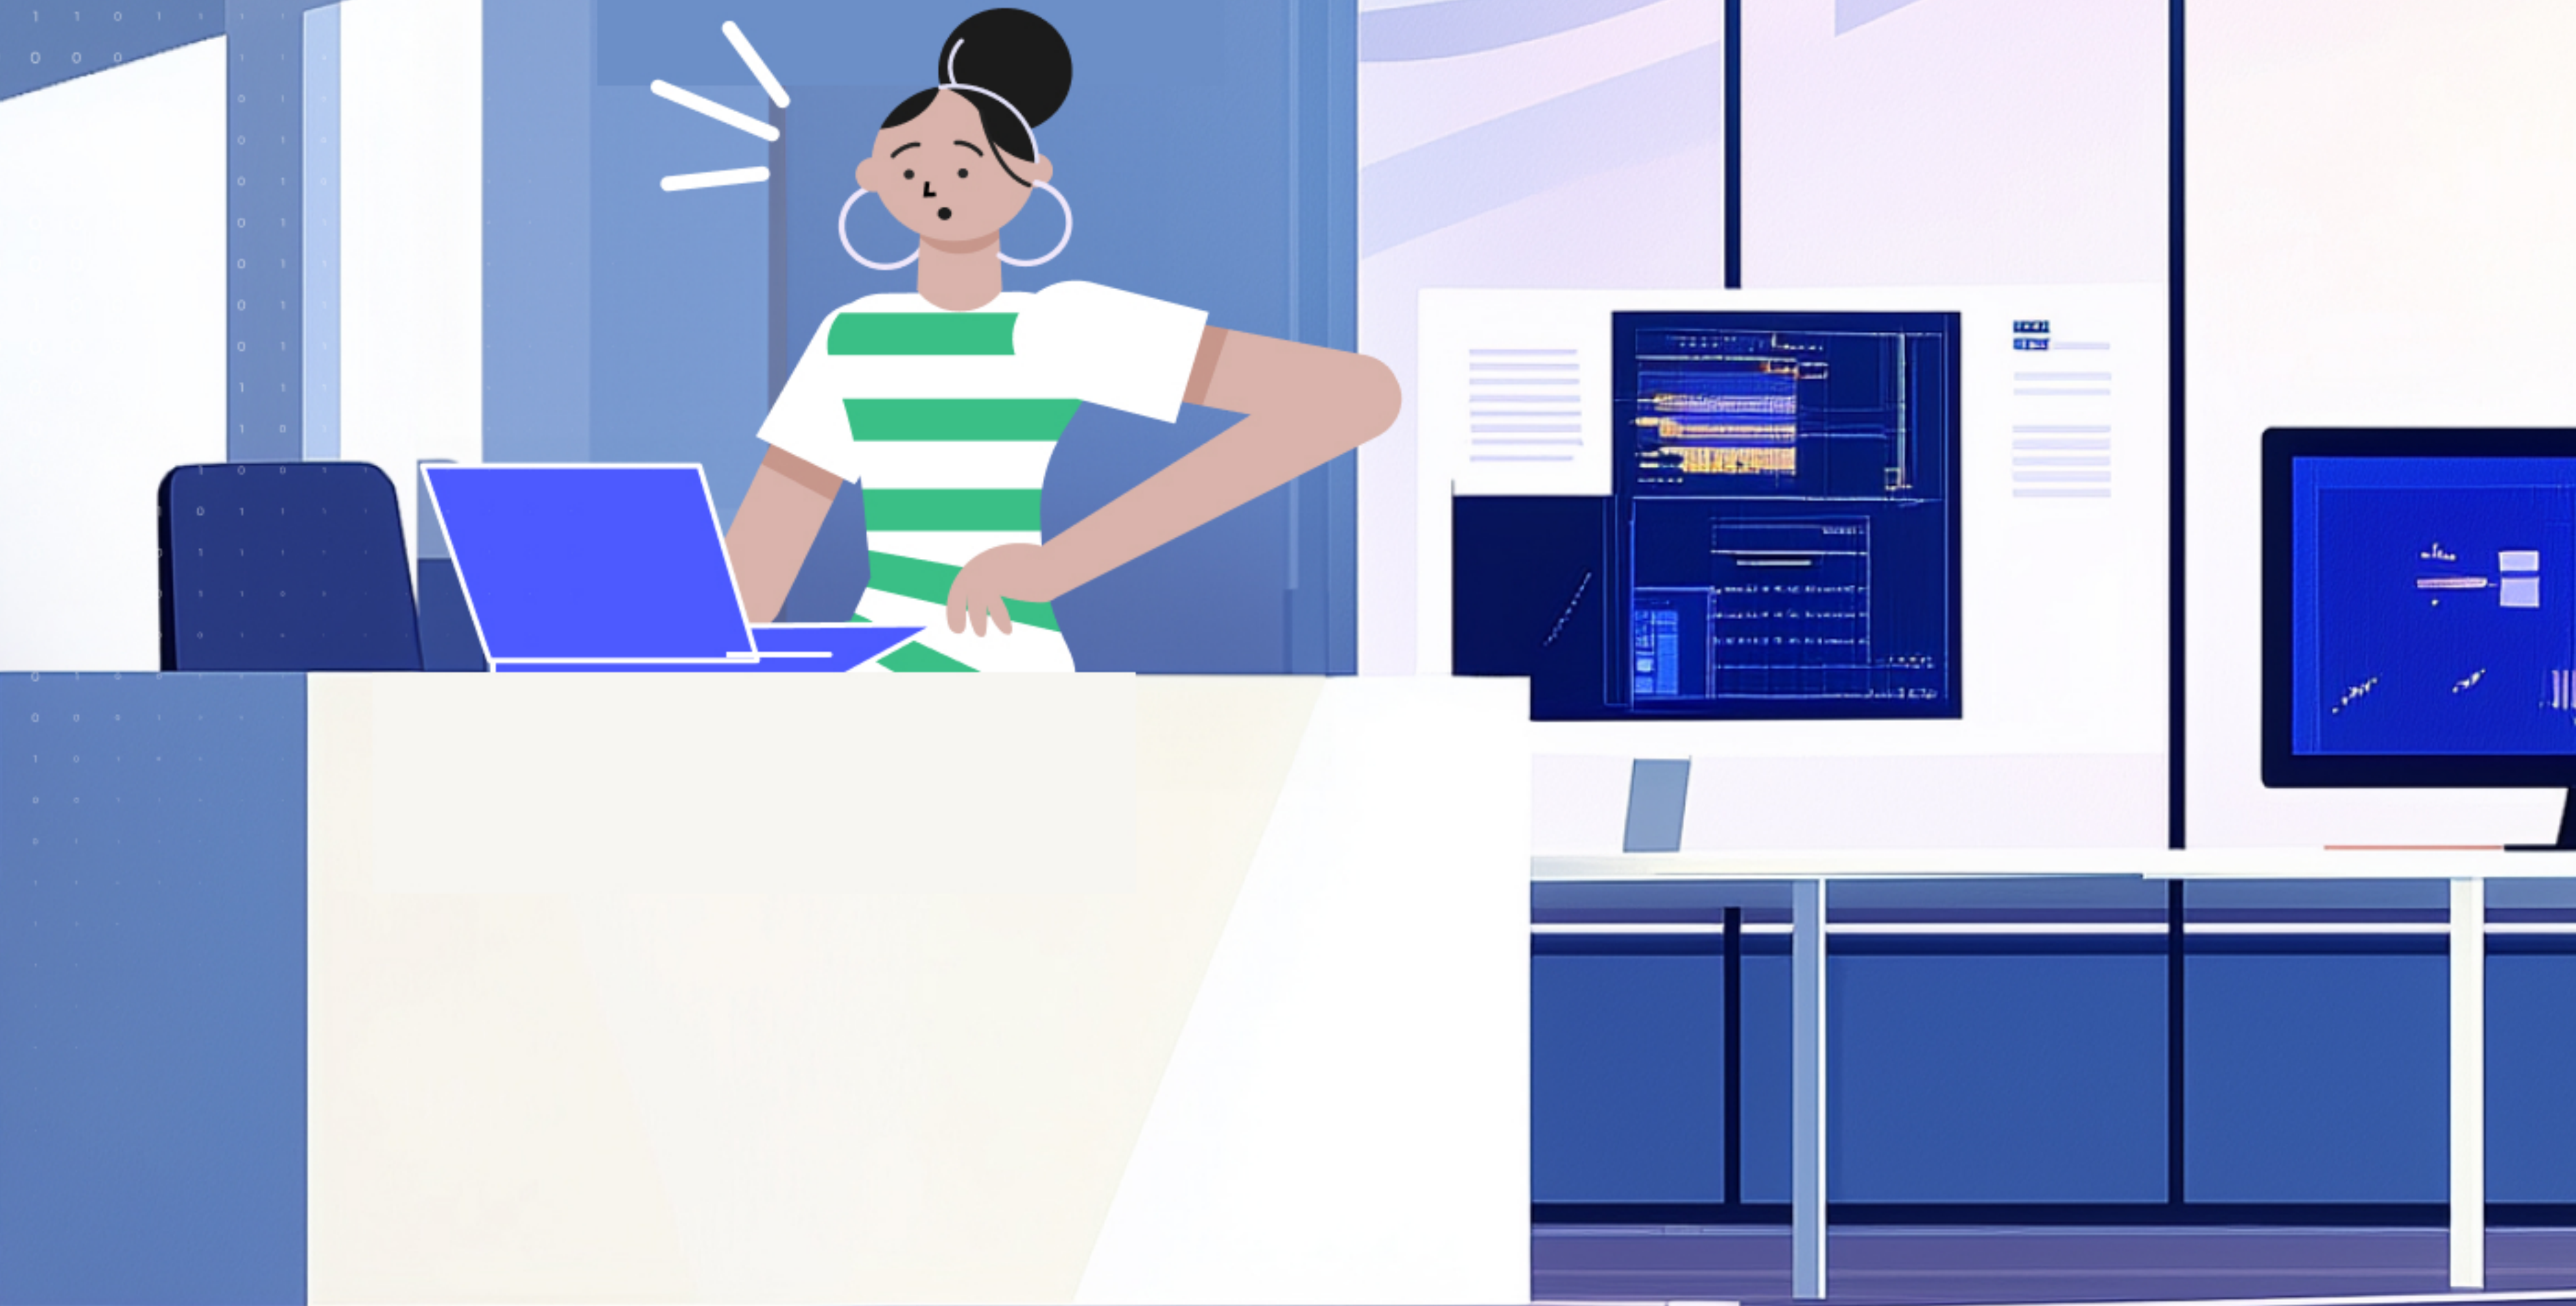

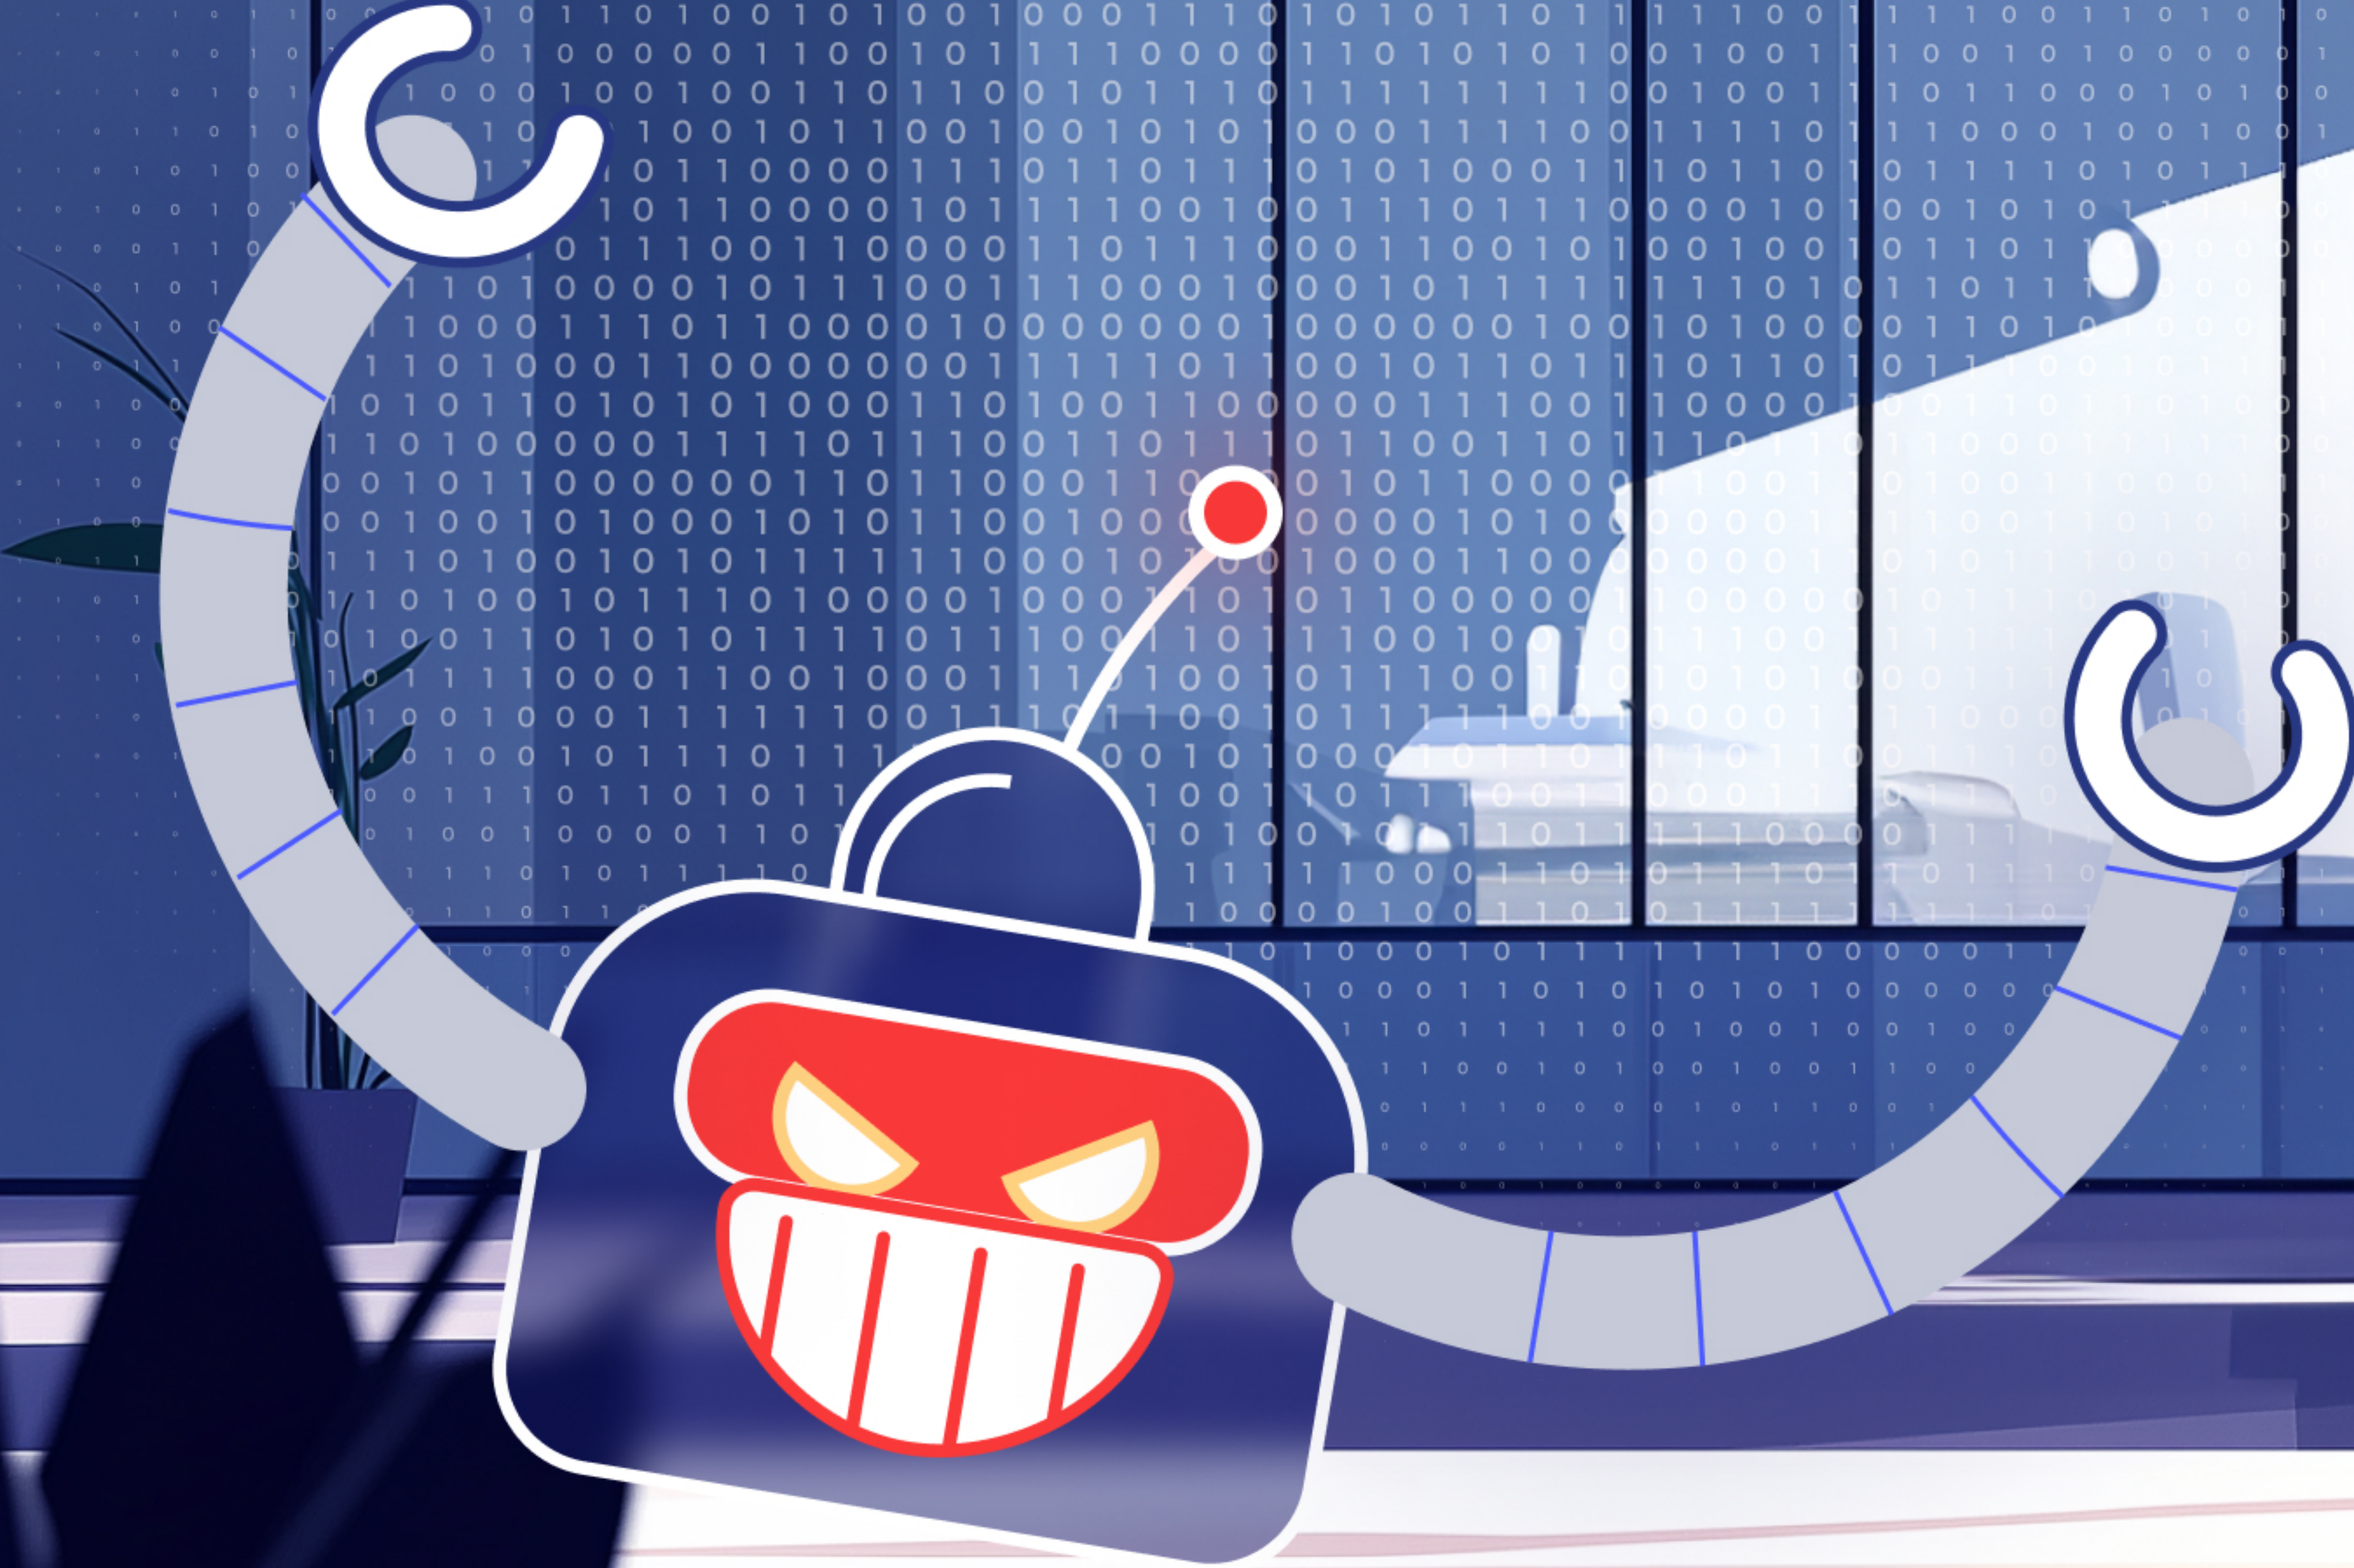

Is there anything in
your **background**
that might be
saying **too much**?

Engage your users,
before hackers do.

Engage your users,
before hackers do.

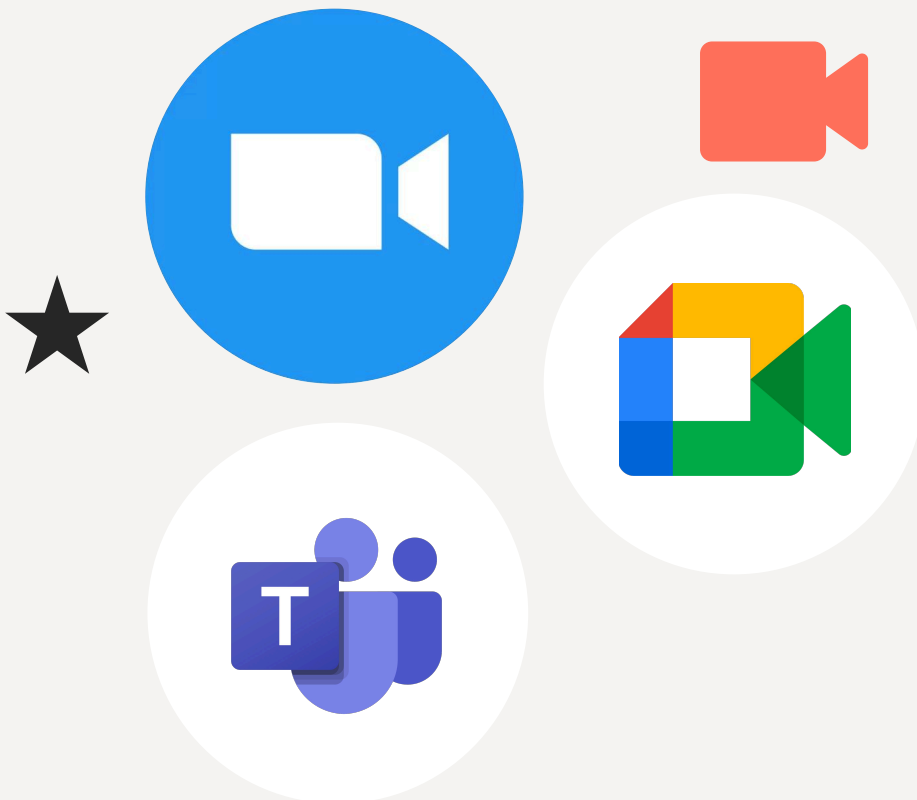

Installation Instructions

Introduction

This document provides step-by-step instructions on how to install and use the Cybersecurity Awareness

Month video call backgrounds in **Microsoft Teams**, **Google Meet**, and **Zoom**.
