

Junior DevOps Engineer

(Microsoft Azure, CI/CD, Terraform, Cybersecurity)

Remote (CET +/- 2 hours), including equity

We are seeking a Junior DevOps Engineer to join our exciting start-up, working within our DevOps Team, working closely with our engineering squads, and playing a key role in building and delivering OutThink's ground-breaking SaaS (Software as a Service) Cybersecurity Human Risk Management Platform.

The platform provides innovative and just-in-time learning experiences, nudges, and simulations to hundreds of thousands of users around the world via both desktop and mobile devices. At the same time, the system monitors training responses, collects security system data and continually gathers feedback. All this data is collated and processed by our cloud engines in Azure, culminating in the provision of sophisticated predictive human risk management models. Our models can drive automated countermeasures, and present analysis results via the delivery of highly visual and interactive on-line dashboards.

The Role

You will be a Junior DevOps Engineer within our high-performing DevOps Team, incorporating DevOps Engineers and Cloud Networking specialists.

The team are responsible for the delivery of automation and cloud infrastructure and tasked with realising and supporting a leading-edge business-critical SaaS platform. You will be expected to use your existing knowledge and learn fast! You will gain exposure to some of the latest in cloud technologies, networking (including zero trust), Machine Learning (MLOps), serverless infrastructure and Kubernetes.

This is a fully remote role in a remote team where open feedback, new ways of working, and thinking out of the box is not only encouraged but expected.

Responsibilities

- Design, implement and manage source control, including GitHub and Azure DevOps.
- Configure and implement build and release pipelines (CI/CD).
- Manage security and compliance plans.
- Build infrastructure scripts and automation with Terraform, Ansible and Packer.
- Support the rollout of new initiatives and platform features.
- Take part in all activities relating to the Agile process; planning, stand-up, grooming, estimation, and retrospectives, promoting transparency and collaboration.
- Helping to support the platform, assisting with issue identification and resolution.

What You'll Need

- Commercial experience in a Junior DevOps or similar role, preferably using the Microsoft Azure cloud. Cross-training to Azure from AWS or Google Cloud will be considered for the right candidate.
- DevOps Tooling skillset, incorporating Terraform, Ansible and Packer.
- Exposure to Agile Development Methodology, working with development teams operating short sprint cycles.
- Experience of Continuous Integration and Continuous Deployment technologies and the approach e.g., Azure DevOps Services and TeamCity.
- Understanding and use of Containerization Technology (Docker, Kubernetes, Nginx).
- Use of cloud-based container registries, such as Azure Container Registry or AWS Elastic Container Registry (ECR).
- Good analytical and problem-solving skills.
- A positive and proactive attitude with strong initiative, team-working skills, and the ability to learn quickly.
- Good communication skills, with the ability to communicate in English in all forms.
- Experience and a deep interest in new technology and innovation.
- Ability to learn new processes and concepts fast with a demonstrated sense of curiosity.
- Intrinsic drive and motivation to build a 'world first' and share our start-up vision.

Desirable

- Training or certifications in Microsoft Azure, such as DevOps Engineer Expert.
- Any DevOps experience with the AWS or Google cloud will be advantageous.
- Previous experience working in a cybersecurity company, or in a cyber-related field.

In Return You Will Receive

- An opportunity to help build a new, highly sophisticated cloud-native platform.
- An opportunity to work with some of the most modern and leading-edge cloud-based technologies available, working closely with top experts in the industry.
- Great start-up culture in a fun, friendly, and hardworking team.
- Flexible remote working
- Competitive salary
- Share options package - a rare opportunity to get in early and have a stake in what could potentially be a unicorn start-up, with a huge financial payback.
- 34 days paid holiday (including public holidays).
- Plus, an extra day off on your birthday!

About the company

OutThink is a young start-up using some of the latest technologies and methodologies to build the world's first truly predictive Human Risk Management Platform (SaaS).

We are building an innovative, disruptive solution, OutThink is the evolution of traditional security awareness training. Used by large, complex organisations around the world, the OutThink SaaS platform has been developed specifically to identify, measure human risk, and affect behaviour change.

OutThink is headquartered in the UK but has been a remote-first company since before the pandemic, with employees working from locations including Spain and the UK. We use the latest collaboration tools to ensure a productive working environment.

We soon expect to be meeting up again in locations across Europe to socialise and for a much needed catch-up.
